

QUICK & EASY ACCESS

The temporary access solution for
accommodation facilities.

QUICK&EASY ACCESS

**THE TEMPORARY ACCESS SOLUTION
ENABLING YOU TO EXPAND YOUR BUSINESS.**

QUICK&EASY ACCESS MEETS THE NEEDS OF DIFFERENT TYPES OF ACCOMMODATION
Without the need for dedicated personnel, it allows access management in:

B&B

SMALL HOTELS

CAMP SITES

**PRIVATE PARKING
SPACES**

WAREHOUSES

**REMOTE ACCESS MANAGEMENT IS
FAST AND SIMPLE FOR BOTH THE OPERATOR AND THE END USER.**

The system provides maximum entry flexibility: users can choose authentication via smartphone or enter a numerical code on a dedicated keypad.

Centralized management allows you to configure gates and time slots, automatically send personalized credentials, and synchronize codes for common areas via the Cloud. Remote gate control and automatic backups ensure operating continuity and maximum security.

Quick&Easy Access elevates the end-user experience, simplifying the receipt of instructions and access codes. Total autonomy in entry procedures eliminates time constraints, ensuring smooth and immediate service.

The CAME ecosystem is based on an intuitive Web portal that eliminates the need to install dedicated applications. This 'zero-app' architecture optimizes user interaction, reducing usage barriers, and dramatically simplifying each step of configuration.

WHERE CAN YOU INSTALL QUICK&EASY ACCESS HOW DOES IT WORK?

Designed for non-stop operation, this system ensures autonomous and efficient entry management at any time of the week. It allows any facility to be manned without time constraints and without burdening the service staff.

QUICK&EASY ACCESS IS COMPOSED OF DEVICES COMMONLY USED IN AUTOMATION AND VIDEO ENTRY SYSTEMS AND USES CONNECT TECHNOLOGY!

RBE Plus, integrated with Cloud gateways and the MTMA/CONNECT range, ensures full interoperability: a single technology for the coordinated management of gates, garage doors and pedestrian entrances.

CAME SOLUTION SPEEDS UP INSTALLATION, PROVING FASTER AND MORE STREAMLINED THAN WIRED SYSTEMS

RBE Plus speeds up set-up at accommodation facilities (B&Bs, hotels, camp sites) by centralizing the management of entrances and eliminating the need for the extensive wiring of individual rooms. Quick&Easy Access is also the ideal choice for remote entrances, overcoming the technical hitches of long-distance wired connections.

No complicated devices. No unknown technology. No structural interventions to the building making installation more complex!

QUICK&EASY ACCESS FOR THE OPERATOR

Automating the process of sending credentials and access codes to the end user makes the operator's job quick and easy.

- Simplified management of access credentials.
- Automated, personalized confirmation e-mail with facility information and logo.
- Use of the Web App to open locks.
- Automatic remote management of codes for keypads.
- Access log.

The operator can also remotely manage and control all connected automations thanks to the AUTOMATION App: gate, entrance door, automatic parking lot barrier, garage door, and even the garden lights or watering system.

BROADEN YOUR BUSINESS. WITH CUSTOMERS AND NEW CONTACTS.

EXPAND YOUR BUSINESS AND NEW OPPORTUNITIES

Integrating Quick&Easy Access into your offer means diversifying your business and protecting previously unexplored high-profitability segments: from the hospitality sector (hotels, B&Bs, camp sites) to logistics and professional facilities.

Quick&Easy Access meets the growing demand for automation with an effective, non-invasive system that offers customer satisfaction while ensuring quick and simplified installation.

AN ADVANCED SERVICE WITH REMOTE DIAGNOSIS

ANALYSIS OF PROBLEMS FROM YOUR WORKSTATION

By using the CONNECT platform (App or PC), you can perform immediate remote diagnostics, resolving anomalies without expensive on-site inspections and drastically optimizing intervention time.

QUICK & EASY ACCESS FOR THE END USER

The CAME solution also offers advantages to the end user.

- ▶ No App to install
- ▶ No registration process required
- ▶ Clear confirmations in various languages
- ▶ Hassle-free reservations
- ▶ Access at any time

The end user logs in without the need for apps, accounts or login procedures: he/she receives a direct link by e-mail with all the necessary credentials and information. A system designed to make the entrance flow immediate, smooth and unobstructed.

SIMPLIFIED PROCEDURES

THE PROCEDURE FOR THE OPERATOR

Creates online access authorization for the user.

Schedules the user's check-in and check-out.

Enables access to gates and common areas.

THE PROCEDURE FOR THE USER

Receives the invitation email with the user access PIN.

Uses the access PIN with his/her smartphone.

Uses the access PIN on the selectors located at the entrance to the facility.

THE POTENTIAL OF QUICK&EASY ACCESS WITH RBE PLUS

The RBE Plus connection can be configured in various modes, depending on the distance between the control unit and the home router. For short distances, the CAME 806SA-0200 gateway, plugged directly into the RBE Plus control unit, allows the connected automations to be controlled within the range of the Wi-Fi signal. For longer distances, CAME QBE AC or a GSM gateway connected to the telephone network must be used.

INFINITE APPLICATIONS

Using the CAME CONNECT cloud, you can manage endless RBE Plus and MTA/CONNECT systems.

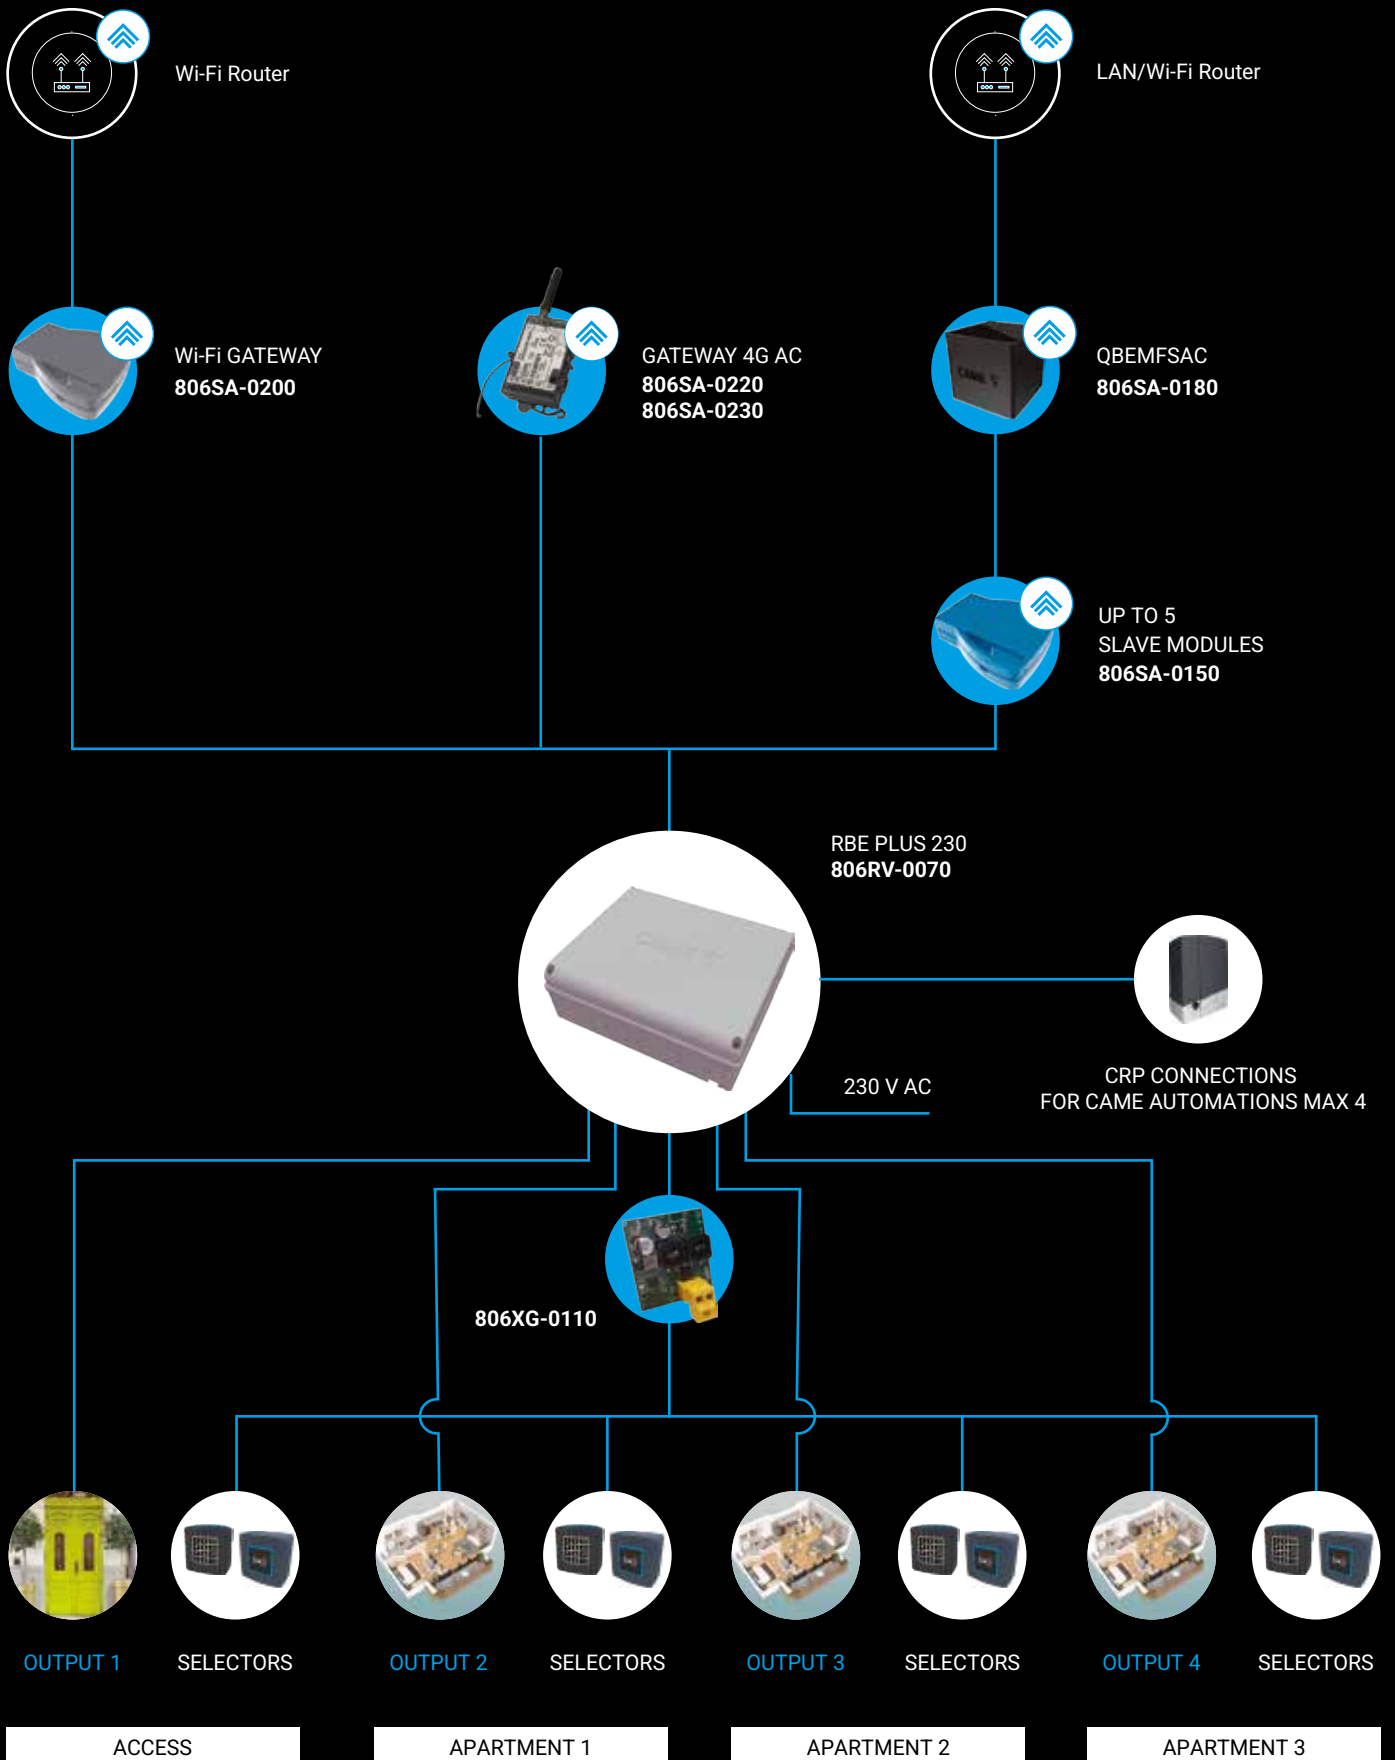

All the devices talk to each other without the need for a wired connection.

QUICK&EASY ACCESS WITH MTMA/CONNECT

NATIVE INTEGRATION AND SCALABILITY

RBE Plus and MTMA/CONNECT are designed to integrate with the Quick&Easy Access system-the ideal solution for B&Bs, hotels, logistics facilities and much more. The synergy between these modules enables the automated management of unique codes for each guest and allows direct contact with the customer via the audio entry system.

GUEST MANAGEMENT AND AUTOMATION

Credentials, which are only valid during the check-in/check-out period, are automatically sent via e-mail. The guest can access the enabled gates by typing the code on the keypad or by logging in from a smartphone, without the need to install any App.

CONTROL AND MONITORING

The same code is used to log in via smartphone, without the need to install any APP, or locally using the keypads installed on the gates.

The owner/management can constantly monitor the event log, verify guest access and the access gate used.

BENEFITS FOR THE OPERATOR

- With MTMA/CONNECT you can answer the audio entry system directly from your smartphone, without the need for any App.
- Remote control, easy and convenient from any place and any device
- Ensure guests have 24-hour access to the facility every day
- Secure access to the facilities
- Remote backup
- Check-in and Check-out management
- Customized invitation email with logo.
- Customized confirmation email in various languages, selectable by the host
- Automated system for access via smartphone
- Personal use of the Automation APP for gate management
- Automatic generation of access codes for use on installed keypads
- A single access code to be assigned to the customer for all authorized access

BENEFITS FOR THE GUEST

- Clear confirmations in several languages
- No procedure required to register
- No APP installation but web browser
- Hassle-free reservations
- Single access code for all entrances to the facility
- Unlimited access at any time during the reserved stay
- Secure management of personal data
- With MTMA/CONNECT you can contact the operator from the audio entry system at any time.

CONNECT is the CAME technology can to manage automations that improve the quality of life. The automations connected over the Internet offer added value for the user and open up new horizons for the installer's business.

CAME has chosen to develop internally the technologies necessary to manage data flow and protection. No external agency processes the information, no server is located in remote locations around the world. An innovative technological heart, to ensure high security and reliability. CAME has invested in research and development with the aim of simplifying the installer's work, improving user experience and offering new digital services.

CONNECT AT THE INSTALLER'S AND ADMINISTRATOR'S SERVICE

Connected automations can be managed remotely via PC or smartphone. The CONNECT platform enables the automatic programming of transmitters, the management of customers and systems installed, the status of devices and scheduled maintenance. CONNECT allows the installer to offer a complete 24/7 service becoming the trusted partner for his customer.

COMPLETE RANGE

QUICK&EASY ACCESS ETHERNET KIT

8K06RV-008 QUICK&EASY Access ETH - Ethernet kit for temporary access management consisting of 1 QBE AC gateway (806SA-0180), 1 RBE230 Plus (806RV-0070), 1 slave module (806SA-0150), 1 wired keypad (806SL-0280) and 1 RCXN accessory (806XG-0110).

QUICK&EASY ACCESS Wi-Fi KIT

8K06RV-009 QUICK&EASY Access WiFi - Wi-Fi AC kit for temporary access management consisting of 1 Wi-Fi gateway (806SA-0200), 1 RBE230 Plus (806RV-0070), 1 wired keypad (806SL-0280) and 1 RCXN accessory (806XG-0110).

QUICK&EASY ACCESS 4G KIT

8K06RV-010 Quick&Easy Access 4G - 4G kit for temporary access management consisting of: One 4G gateway with built-in radio (806SA-0220), 1 RBE 230 (806RV-0070), 1 wired keypad (806SL-0280) and 1 RCXN accessory (806XG-0110).

MTMA/CONNECT AUDIO ENTRY MODULE

840AD-0010* The MTM CONNNECT 4G module can make calls in speaker phone mode, to mobile and landline numbers by pressing on the call buttons or entering codes on the MTMKB keypads. From the telephone, the user can open the door or activate the auxiliary relay using the keypad during a call or through the "dial to open" function. Supports remote configuration and management via the CONNECT SetUp app and is preconfigured for CAME Key. The MTM CONNNECT can control up to two CAME automations and offers gateway functionality. It also supports sending commands to access control systems and automations via the Automation App

* Build your MTMA/CONNECT using the online configurator

FUNCTIONS

MODEL	806RV-0060	806RV-0070
Password programming access	YES (4 digits)	YES (4 digits)
Connector for AF radio card	■	■
CAME CONNECT compatibility	■	■
Built-in clock function	■	■
Simultaneous management of numeric keypads and transponders	■	■
Automation connections via CRP protocol	■	■
Event log	■	■
Integration as a QUICK&EASY ACCESS system	■	■

OPERATIONAL LIMITS

Max. number of users	5000	5000
Inputs	4	4
Outputs	4	4
Connections via CRP	4	4
CXN BUS access connections	8	8

TECHNICAL FEATURES

Protection rating (IP)	54	54
Power supply (V - 50/60Hz)	24 AC - DC	120 - 230 AC
Operating temperature (°C)	-20 ÷ +55	-20 ÷ +55
Container material	ABS	ABS

● 120 - 230 V AC ● 24 V AC - DC
