# HOW IT WORKS

CAME.COM

The VER PLUS CONNECT kits provide remote control of your garage door and activate remote assistance from your installer for any need.

## VER PLUS CONNECT MAIN FEATURES

- **VERSATILE**  
two versions for doors :  
up to 18 m<sup>2</sup> with 1000 N of traction force  
up to 21 m<sup>2</sup> con 1300 N of traction force
- **SMART WITH WI-FI CONNECTION**  
for control via smartphone or tablet
- **TOP REMOTE CONTROL**  
stylish and secure with Rolling Code technology for storing up to 250 different users
- **SAFE THANKS TO THE ENCODER**  
for efficient deceleration control
- **LOW ENERGY CONSUMPTION**  
with 24V motor and LED courtesy light
- **WITH OPTIONAL EMERGENCY BATTERIES**  
optional in case of blackout
- **EXTERNAL DISPLAY WITH KEYPAD**  
for Open/Stop/Close functions  
programming and malfunction warnings
- **VERIFICATION FUNCTION**  
for automatic control of safety accessories
- **COMPATIBLE WITH**  
belt and chain guides

# "ALEXA, OPEN THE GARAGE DOOR"

## WI-FI CONNECTION FOR MANAGEMENT FROM SMARTPHONE

In addition to the exclusive TOP remote control, the VER PLUS CONNECT kit includes a Wi-Fi GATEWAY that allows the automation to be connected to any router in the home.

Thanks to the practical Automation App, it is possible to control the opening and closing of the tilting door directly from your smartphone, and to monitor the status of the automation remotely, also by means of a Web App on a PC.

The practical GATEWAY is plugged directly into the electronic board, is easily configurable and is compatible with all Wi-Fi routers available on the market.

### SMARTPHONE APPS

CAME Automation available on:

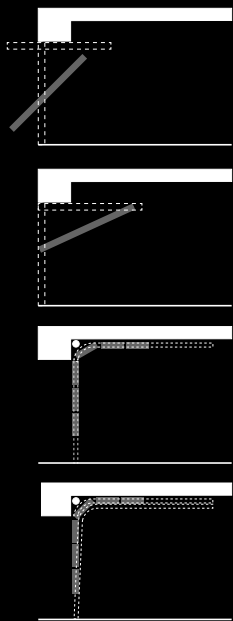

## VOICE COMMAND COMPATIBLE WITH AMAZON ALEXA

With VER PLUS CONNECT, the automation can also be operated using Amazon Alexa voice control. All you have to do is say the command to open or close your garage door, whether at home or in the car.

# ONE VER PLUS

SYSTEM can be applied to all types of garage doors, such as

- Counter-weighted or spring-balanced partially retracting protruding tilting door
- Counter-weighted or spring-balanced totally retracting protruding tilting door
- Sectional door with single guide
- Sectional door with double guide

## 24 VOLT GEARMOTOR

Tested according to European Standards and equipped with Encoder

## CONTROL AND SAFETY ACCESSORIES

Compatible with all CAME accessories and equipped with a verification function for automatic photocell control.

## WIRELESS ACCESSORIES.

Compatible with the RIO system for wireless connection of photocells, sensitive edges and flashing lights.

**GRAPHIC DISPLAY WITH  
KEYPAD**

Open/Stop/Close function.  
self-diagnosis and  
programming

**IN-LINE OR 90° GUIDE WITH BELT OR  
CHAIN DRIVE**

The gearmotor can be installed in line  
with the guide or at 90° to the guide if  
there are obstacles such as ceiling lights  
or lamps. In addition, it is compatible  
with all belt and chain drive models.

**LED COURTESY LIGHT**

Low consumption and high  
energy efficiency.

**INCLUDED IN THE KITS:**

TOP series radio control with ROLLING CODE  
dual frequency technology for maximum  
security against cloning (4,294,967,896 possible  
combinations).

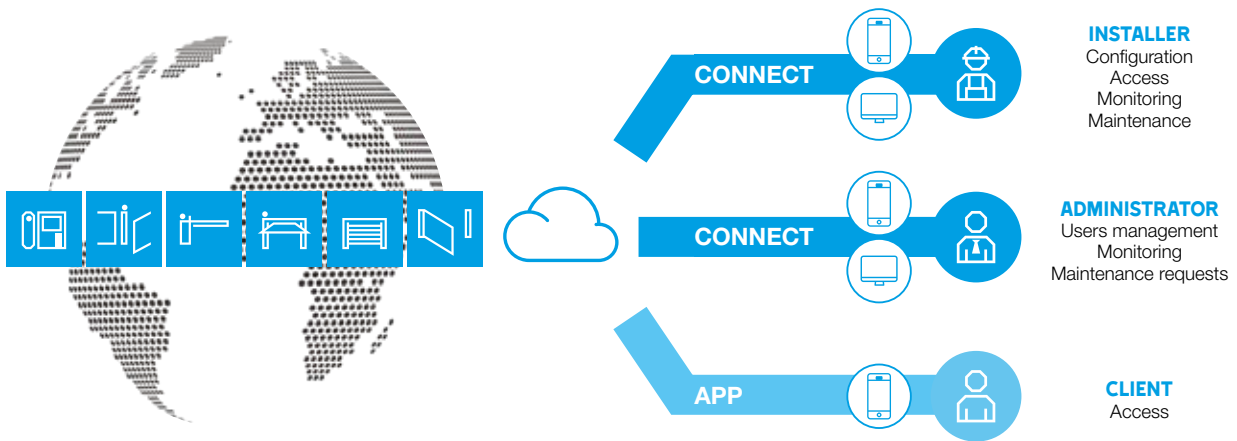

The four channels make it possible to control  
several automations with the same remote control.

CONNECT is the CAME technology that makes it possible to manage automations capable of improving the quality of life. Automations connected via the Internet offer added value to the user and open up new horizons for the installer's business.

CAME has chosen to develop in-house the technologies required to manage data flow and protection. No external agency processes the information, no server is located in remote locations around the world. An innovative technological heart that guarantees reliability and high security. CAME has invested in research and development with the aim of simplifying the installer's work, improving user experience and offering new digital services.

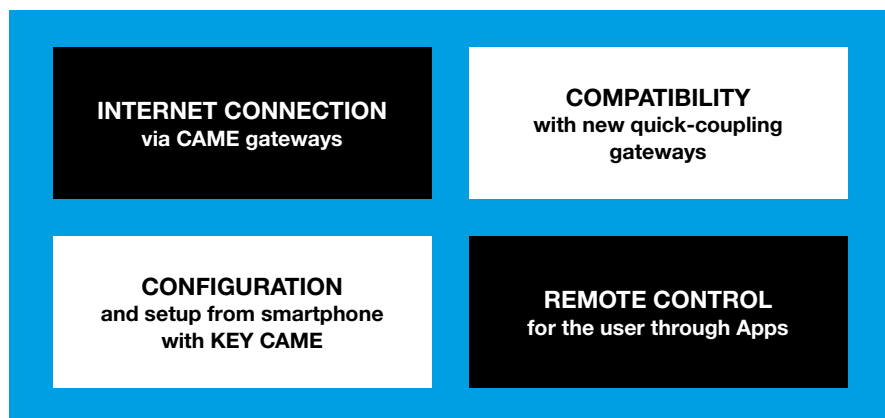

### CONNECT AT THE INSTALLER'S AND ADMINISTRATOR'S SERVICE

Connected automations can be managed remotely via PC or smartphone.  
The CONNECT platform enables automatic programming of transmitters, management of customers and systems installed, and monitoring of device status and scheduled maintenance.  
CONNECT allows the installer to offer a complete 24/7 service becoming the trusted partner for his customer.

### CONNECT AT THE CUSTOMER'S SERVICE

Through the free Apps that can be installed on any Android or iOS smartphone, the user can control the devices remotely.  
Compatible with Amazon Alexa devices, CAME automations can also be controlled by voice command.

## CONNECT MEANS

# WI-FI GATEWAY FOR INSTALLERS

Thanks to the wi-fi GATEWAY, your installer can remotely access your system to keep it in perfect working order. For example, you can ask the technician:

- Update firmware on the control board for new features.
- Manage all automation parameters
- Check maneuvers for scheduled maintenance.
- Radio controls configuration via QR code.

CONNECT SetUp  
available on:

Gateway Wi-Fi/Bluetooth  
806SA-0140 included in the kit

# QUALITY FOR CAME

IS THE GUIDING PRINCIPLE  
OF EVERYTHING.

VER PLUS CONNECT is completely made in Italy and, like all CAME automation solutions, is the result of our smart production model that includes the digitization of each phase, integrating a complete series of tests on 100% of the products.

- Safety microswitch testing
- Functional test
- Control board functional test
- Traceability of test data on serial number and production batch
